Interactive comment on "Optimization of coagulation-flocculation parameters using a photometric dispersion analyser" by S. Ramphal and M. Sibiya

Anonymous Referee #1

Received and published: 16 March 2014

General comments In this paper the use of a photometric dispersion analyser is proposed as a tool to optimize coagulation-flocculation parameters while monitoring floc size and structure during coagulation. I think this paper is really interesting for the readers of DWES and deserves publication.

Specific comments The acronyms should be defined the first time they appear in the text.
