Dear Mr. K. Chon, As I wrote in the authors comment to your valuable comment, I agree that missing the effective surface area of the manganese containing deposits is a shortcoming. I propose to investigate the possibility to let determine the effective surface area on short term and will inform you as soon as possible about the outcome. If I will succeed, I propose to extent subsection 3.2.1 and Table 1 with the numbers and include the effective surface area in the discussion in subsection 3.2.2. Best regards, Antonie Knol
