Dear Reviewer #1,

thank you very much for spending the time to review the article and the kind evaluation. The article by Todini and Rossmann gives a recent review and classification on solution algorithms for the Demand Driven Model that complements the paper by Carpentier very well. It has been added to the literature in chapter on DDM. Also in the chapter on DDM we added a sentence on the GGA, which can be interpreted as a Newton method applied to equation 5 in the article.

Best regards, Mathias Braun
