Thank you for your comments

The manuscript summarized the global trends on water reclamation on industrial use, and to derive lessons for implementation of water reclamation projects in Sub-Saharan Africa. The authors believed technical challenges, changing legislation, introducing new policies, adoption of alternative financial structures and subsidies will support water reclamation. The paper is well organized and written, however some of the citation need to be updated. This paper can be published. Page 3 line 15, Table 1 summarized the regional variation in water reclamation, however the data for Asia should be updated as this area maybe similar to Africa to some extent. Answer: some recent

Discussion paper

literature was included, to update the citations on pages 1 and 2, lines 23, 28, 32 and in the table 1 page 3 the reference for Asia was updated.

Kind Regards Noor
