Interactive comment on "Water Reclamation for industrial use in sub-Saharan Africa, a Critical Review" *by* Noor J. Gulamussen et al.

N. S. Maurya (Referee)

nsmaurya@nitp.ac.in

Received and published: 12 September 2018

The authors have presented a review on water reclamation for industrial use in sub-saharan Africa incorporating latest and relevant literature. Global trends on water reclamation have also been discussed in detail. However, information/data related to water reclamation potential of sub-saharn region in terms of sources/quantity of wastewater which could be reclaimed and uses of reclaimed water is missing. Comment 1 Page 2 line 6: Data related to global reclamation capacity 0.337 million m3/d in 2010 and 0.545 million m3/d should be checked. Comment 2 Page 8 line 27: Table 4 does not provide any information related to water quality. Comment 3 Information provided in last column of Table 2 should be checked.
