

## ***Interactive comment on “Surface Water Purification using cellulose Paper Impregnated with Silver Nanoparticles” by Shahad A. Raheem and Alaa H. Alfatlawi***

**Mona Soliman (Referee)**

m.y.m.soliman@tudelft.nl

Received and published: 2 December 2020

Section 2.5, microbial testing: Please describe how the testing of the paper was done. For example: X ml of water was used & the paper was submerged in it for x time. Then sample amount x was extracted ...etc

Section 3, Results and discussion: Placing the study results in wider context remains missing. How does your results compare to previous findings of other studies. Is it same? Is it different? if different can you explain why?
